

In Pregnancy and Postpartum PGP guidelines and research (RCT's) 16 questionnaires are used to evaluate PGP/LBP outcomes (publication period 2006-2016): DRI, EQ-5D, OCI, OLBPDQ, PDI, PMI, PGQ, PRAFAB, PSFS, NPRS, QBPDS, RDQ, SF-MPQ, SF-8, SF-36, VAS*

Three out of 16 used questionnaires are condition specific for PGP:

- Overall Complaint Index (OCI)
- The Pregnancy Mobility Index (PMI)
- The Pelvic Girdle Questionnaire (PGQ)

OCI is validated in pregnancy. Both PMI and PGQ are validated in pregnancy and postpartum first year.
